12 March 1984

Weekly Report

Directorate of Administration

- Negotiations have begun with [redacted] for a study of low frequency magnetic emanations. Electronic equipment used for data processing, communications, and magnetic recording generate and emit electromagnetic radiation in some frequency ranges which may permit signal detection and information compromise at a significant distance. This is of great concern to the communications community, and it is anticipated that this study will determine if there is an actual threat, and, if so, to what extent.

25X1

25X1

- On Monday morning, 12 March, the DDA, the Director of Data Processing, and the Director of the Consolidated SAFE Project Office were to have briefed Dr. William O. Baker, Chairman of the Diplomatic Telecommunications Service Policy Board, on the status of Project SAFE.

Directorate of Operations - No report.

Directorate of Science and Technology

25X1

Directorate of Intelligence

- ACIS has nearly completed coordination on the first set of SSCI questions and has begun work on the second set (about 40) from the 28 February hearing; some questions dealing with policy will have to be formally transferred to ACDA.
